

## ACP 62121 | AC POWER SUPPLY

### **Technical specifications :**

- Bench top high quality metal case, 230VAC operation.
- The necessary technical specifications are permanently imprinted at the front of the case.
- Output Voltage : 2 X 6VAC / 2A & 2 X 12VAC / 1A
- With the appropriate circuit connections it can also produce 18V, 30V, 36VAC
- It has an electronic protection in the case of a short circuit or an overload through an electronic control circuit with the ability of resetting the power supply circuit.
- All the necessary circuit imprints and an operation manual are provided.
