

## ATP 100 - 1M - 1T | ONE PHASE MOTOR TRAINER

With the one phase motor trainer one can study the automated change of the direction of rotation of a one phase motor .

### **The trainer is composed of :**

#### **ATP 1M**

➤ A one phase 350 Watt motor mounted on a base with an integrated panel for all the necessary electrical connections and an integrated disk as an indication of the change of the rotation direction both protected by a transparent cover.

#### **ATP 100**

➤ A control unit deployed on a panel placed in a metal case that has imprinted the electrical diagrams of the circuits and the components.

#### **ATP 1T**

➤ An one phase power supply unit with an EMERGENCY STOP switch.

All the components are of excellent quality and safety certified by the international quality standards while every connection is made through safety sockets.

The trainer includes all the necessary safety connection cables, with a double layer cable and insulated banana type tips that permit the students to make all the necessary connections without coming in touch with the high electric voltage.
