

ATP 105 | DELAY ON - DELAY OFF TRAINER

With the ATP 105 trainer the following subjects are covered :

- Delay off
- Delay on

The trainer consists of :

- A ventilator and a control unit deployed on a board that has imprinted the electrical diagrams of the components and of the circuits, is placed in a metal case.
- A one phase power supply unit with an EMERGENCY STOP switch.

All the components are of excellent quality and safety certified by the international quality standards while every connection is made through safety sockets.

The trainer includes all the necessary safety connection cables, with a double layer cable and insulated banana type tips that permit the students to make all the necessary connections without coming in touch with the high electric voltage.
