

## DCS 15252 | REGULATED (SYMMETRIC) POWER SUPPLY

### **Technical specifications :**

- Bench top high quality metal case, 230VAC operation.
- The necessary technical specifications are permanently imprinted at the front of the case where there is also a panel voltmeter for the adjustment of the symmetric voltage.
- Output voltage :  $\pm 5$ VDC / 2A regulated  
 $\pm 1$  to  $\pm 15$  VDC / 2A with constant adjustment regulated  
Load stabilization lower than 0,2 %
- Electronic short circuit protection for unlimited time.
- Thermal protection.
- Each voltage output is provided by a separate circuit.
- All the necessary circuit imprints and an operation manual are provided.
